# What are Authentic Assessments?

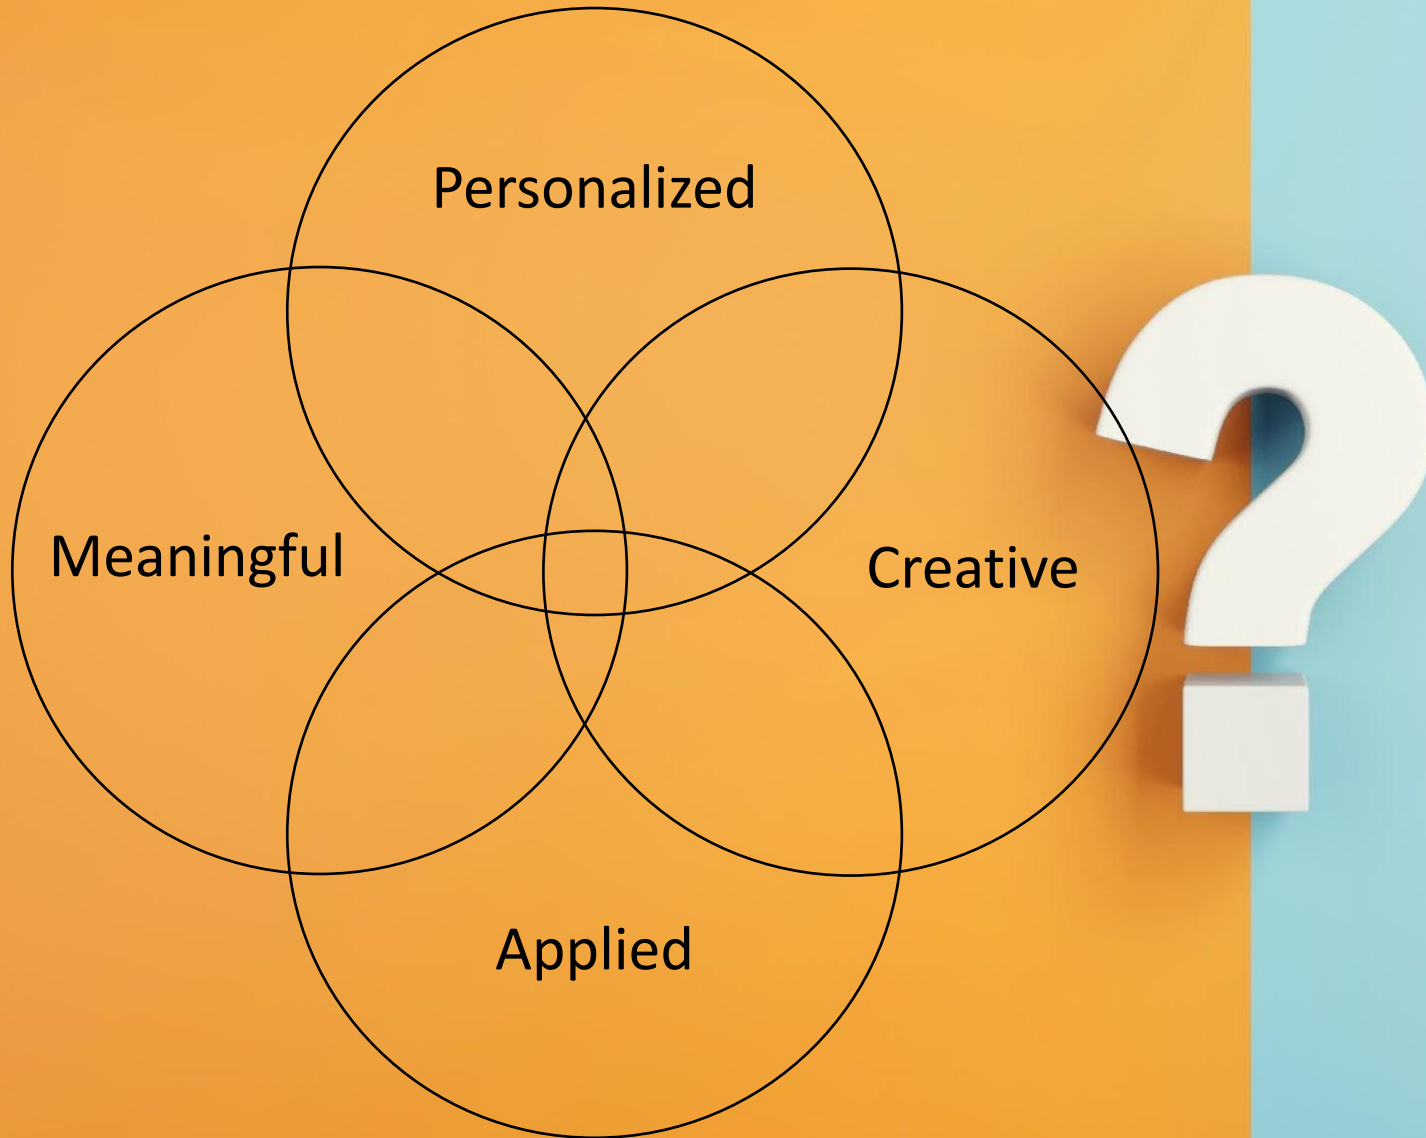

# What are Authentic Assessments?

**Wiggins** (1993) states “engaging and worthy problems or questions of importance, in which students must use knowledge to fashion performances effectively and creatively. The tasks are either replica of or analogous to the kinds of problems faced by adult citizens and consumers or professionals in the field.”

According to **Muller** (2005), Authentic assessments are "A form of assessment in which students are asked to perform real-world tasks that demonstrate meaningful application of essential knowledge and skills."

# What are artifacts?

*Their skills*

*Their knowledge*

*Their experience*

*Their lives*

*Their interests*

*Their career goals*

Intro to Psychology

Child Development

# Artifacts as evidence of learning

## Artistic or Creative:

- Drawings, Paintings, Photos
- Videos, Podcasts
- Poems, Short stories
- Infographics, Cartoons

## Practical and Applied:

- Research proposals
- Analysis papers
- Literature reviews
- Written, PPTs, Videos

# Rubric

Category	Requirement	Learning Objective
Content Accuracy	10 terms applied correctly	Content
Research Beyond the Textbook	One valid external source	Content + Skills
Applying Material to a New Context (Creativity)	Application not found in textbook	Content + Skills + Transfer
Connection	Personal or Real-World	Content + Skills + Transfer
Communication	Accessible to a non-expert audience	Content + Skills + Transfer
Glossary	Correct definitions, accurately applied	Content
Mechanics	APA format, & clarity of writing	Content + Skills

# Examples of Student Work

## Weber's Law

How much dirt would I need to add to the coffee for you to taste it?  
How much more can I turn the hot knob in the shower for you to feel it?  
How much lower must the sun sink to notice it's getting dark?  
How many days without showering will it take for you to smell me?

What I want  
is an **absolute threshold**.

How much do you have to tighten the banjo string to hear the pitch rise?  
How many textbooks do I have to stack on my head to feel my skull caving in?  
How much lemon do I need to add to your sweet tea for you to taste my sourness?

Give me  
difference Limen.

The truth is,  
as the magnitude of a stimulus increases,  
the difference threshold does too,  
in a predictable proportion.

I sit  
feeling the weight of my standards.

For most senses, its ratio  
to the difference threshold remains constant.  
Or at least, that's what the Weber fractions told me.

Oh, K.

But still I wonder,  
serving up  
muddy coffee and acidic black tea  
in the hot water darkness  
with sweaty crevices,  
studying psychophysics  
to the always out-of-tune banjo.

# Completing the artifacts allowed me to apply what I learned in the course to...

something personally relevant

■ Agree ■ Neither ■ Disagree

real-world problems

■ Agree ■ Neither ■ Disagree

# Completing the artifacts strengthened my...

## study skills

■ Agree ■ Disagree ■ Neither

## time management skills

# Artifacts and Learning Outcomes

# Open-Ended Feedback

# What's Next?

- 2nd iteration of the ACS Grant
- New instrument to measure:
  - Self Efficacy
  - Stress
  - Procrastination
  - Engagement
  - Perceptions about learning
- Mentor/Mentee teams

**Apply what YOU have learned**

Is there an assignment you would like to make more “authentic?”
